Professional Summary

Physics graduate with expertise in Data Science, Machine Learning, Deep Learning, and Generative AI. Skilled in Python, SQL, MySQL, Power BI, NLP, LLMs, Transformers, RAG, and Multimodal AI. Hands-on experience building AI/ML pipelines, neural networks, and data-driven solutions. Seeking AI Engineer / AI Developer / ML Engineer roles to deliver intelligent and scalable AI solutions.

Technical Skills

Generative AI and LLMs: Large Language Models, Retrieval-Augmented Generation, RAG, Prompt Engineering, Fine-tuning, Gemini API, Ollama, Vector Databases, Multimodal AI
Deep Learning and NLP: Transformer Architectures, CNN, ANN, LSTM, YOLO, OCR, Transfer Learning, Natural Language Processing, Sequence Models, Attention Mechanisms
AI ML Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, Hugging Face Transformers, Stable Diffusion, OpenCV, MediaPipe
Programming and Tools: Python, SQL, Git, Jupyter Notebook, Streamlit
Data Engineering and Databases: MySQL, Vector Databases, Data Preprocessing, Feature Engineering, ETL, ELT
Visualization and Analytics: Power BI, Matplotlib, Seaborn, DAX, Statistical Modeling, Predictive Analytics
Cloud and Deployment: AWS, IAM, EC2, S3, Model Deployment, Streamlit

Professional Experience

Data Science Intern

June 2025 – February 2026

Luminar Technolab

Ernakulam, Kerala, India

- Developed ML and deep learning pipelines using Python, TensorFlow, and PyTorch for production deployment.
- Built AI-powered applications using Generative AI, LLMs, transformer models, and RAG architectures for intelligent systems.
- Implemented computer vision solutions with YOLO, OCR, and neural networks for object detection and text extraction.
- Created Power BI dashboards integrating ML model outputs with business intelligence for data-driven insights.

Data Science and Machine Learning Intern Remote

January 2026 – March 2026

Zaalima Development Pvt. Ltd

Bengaluru, Karnataka, India

- Building AI solutions using predictive modeling techniques and end-to-end ML pipelines for real-world applications.
- Performing data preprocessing, feature engineering, model development, and performance optimization.
- Gaining hands-on experience with model evaluation, hyperparameter tuning, and deployment workflows.

Key Projects

AI-Powered Medical Document Analysis System | RAG, FAISS, Ollama, Streamlit, Python

- Engineered an AI-powered Medical Document Analysis System using RAG architecture for contextual question answering from clinical PDFs
- Implemented semantic search with FAISS and local LLM integration Ollama to generate accurate, context-aware medical insights
- Built an end-to-end pipeline covering document parsing, embedding generation, retrieval, and LLM-based response generation via Streamlit UI
- Enabled simplified explanations and risk-indicator extraction from structured medical summaries, improving document interpretability

AI-Based Driver Monitoring System | Python, OpenCV, MediaPipe

- Created a real-time driver safety system using computer vision and facial landmark detection
- Detected drowsiness, yawning, and mobile phone usage through eye aspect ratio and hand landmark analysis
- Implemented instant alert mechanisms to reduce accident risk and enhance driver awareness
- Optimized frame-level processing for low-latency live performance

YouTube Video Performance Prediction | Python, KNN, Random Forest, Streamlit

- Built a Machine Learning model to predict video performance based on engagement and audience behavior features
- Implemented KNN and Random Forest models with feature engineering and performance comparison
- Handled class imbalance using SMOTE to improve prediction reliability
- Deployed the model using Streamlit for on-demand video success prediction

Uber Data Analysis Dashboard | Power BI, DAX, Data Modeling

- Analyzed 150K+ Uber ride records to identify peak demand hours, revenue-driving vehicle categories, and customer payment preferences
- Designed interactive Power BI dashboards using DAX measures, slicers, and KPIs for business-level decision support
- Discovered Auto, Bike, and Go Mini as top revenue contributors with UPI as the dominant payment mode
- Provided actionable insights on driver allocation and surge timing to improve operational efficiency

Meta Ad Performance Analysis Dashboard | Power BI, Digital Marketing Analytics

- Developed a 360 degree Power BI dashboard analyzing Facebook and Instagram ad campaigns across demographics and regions
- Evaluated campaign effectiveness using CTR 11.76 percent, engagement rate 13.56 percent, impressions, and ROI metrics
- Compared ad formats video, stories, feed to identify high-performing audience segments
- Recommended budget reallocation and retargeting strategies to improve conversion efficiency

Education

St. Xavier's College, Vaikom

June 2022 – March 2025

Bachelor of Science in Physics

Kottayam, Kerala

Government Higher Secondary School, Vaikom

June 2020 – March 2022

Higher Secondary Education in Science

Kottayam, Kerala

Additional Skills

Creative Skills: Video Editing, Videography, Content Creation, Visual Storytelling

Soft Skills: Problem-Solving, Critical Thinking, Team Collaboration, Project Management
